New messenger – ring binding with info function

The EcoBirder is a
technical and
binding machine
for the production
of new and
ecological products.

Up to now, calendars and writing
books were bound with metal or plastic spiral
wires. But the mixture of paper and metal in these traditional
binding makes it necessary to separate the metal
binding prior to recycling, which costs money. Metal bindings also involve
the risk of injury, especially if the pad is used.

Things have changed
from the 1980s
when writing
books consisted
of a single sheet
which was
new to the
product.
