

Splicer X-Package Upgrade

Upgrade

Splicer X Upgrade Application

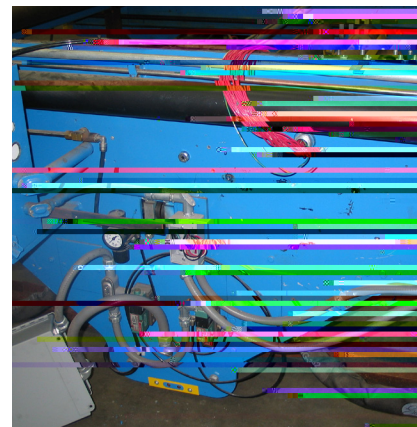

- Applicable to all Model I and IM Splicers. Splicers need to have a dual dancer roll system, 76 mm (3 in.) Cable cylinders, existing or upgraded standard capstan motor system, and be PLC controlled or upgraded.

Splicer X Upgrade Description

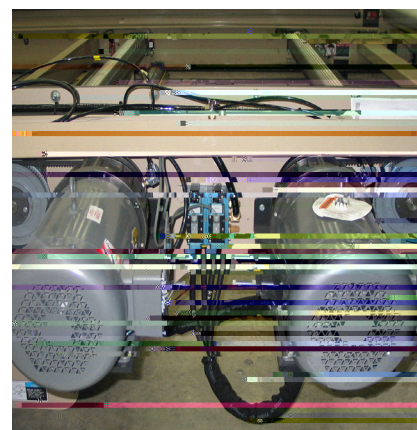

- Features additional high HP capstan roll and motor, and larger capstan motor for existing capstan roll.
- New hardware:
 - After removal of the existing components, the new roll, motors, pulleys, belts and guards are installed. Motors will be wired to control cabinet.
 - Control cabinet will be updated with necessary controls and components.

Splicer X Upgrade Benefits

- Increases the paper splice speed by 50 MPM (150 FPM)
